***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to pattern recognition based on shape and form analysis, classified in class 382, subclass 203.
  - II. Claims 7-13, drawn to pattern recognition based on template matching, classified in class 382, subclass 218.
  - III. Claims 14-21, drawn to pattern recognition based on point features, classified in class 382, subclass 201
- The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as pattern recognition based on shape and form analysis of the components (i.e., curves, bays, loops, convex arcs, etc.), geometrical configurations (i.e., rectangles, circles, triangles, parabolas, etc.), or fundamental space measurements (i.e., distance, area, circumference, ratio of perimeter to area, etc.). Invention II has separate utility such as pattern recognition by template matching wherein the known patterns, are compared to an as-yet-unrecognized input patterns. Invention III has separate utility such as determining whether essential points in a pattern are present at specific locations. See MPEP § 806.05(d).

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
